Education

IMT Mines Alès – Alès, France — Aug 2026 – Jun 2028 (Expected)
Double Degree M.Sc. Program, SI4-IA
Available full-time for a 13–17-week internship starting in May or June 2027.

Federal University of Pernambuco (UFPE) – Recife, PE, Brazil — May 2021 – Nov 2028 (Expected)
B.Sc. in Computer Engineering — **Academic Average: 8.24/10**

Skills

Programming & Frameworks: Python, Java, TypeScript, JavaScript, C#, React, Angular, Spring Boot, Node.js
Software Engineering & Systems: Data Structures & Algorithms, Unix/Linux, REST APIs, Git, Docker, CI/CD, Bash/Shell
Cloud, Data & AI: AWS (ECS, S3, RDS), GCP, PostgreSQL, MongoDB, PyTorch, TensorFlow, scikit-learn, NLP
Languages: Portuguese (Native), English (C1, TOEIC), French (B1, TCF)

Experience

Software Engineering Intern, Brilliant Youth Program, QuintoAndar – Remote, Brazil — Jul 2025 – Jun 2026
- Optimized rendering, asset loading, and client-side performance, achieving an **11% performance gain** for **12M+ monthly users** and improving **Core Web Vitals** and SEO performance.
- Implemented A/B experiments and integrated **React** flows with **Spring Boot APIs**, increasing lead generation by **120%** across **300K+ monthly users**.
- Replaced an external property verification workflow with an internal service, increasing throughput by **35%** and reducing validation time by **25%** across **20K+ monthly listings**.

Software Engineering Intern, FlowUp – Recife, PE, Brazil — Dec 2024 – Jul 2025
- Built reusable **Angular** components and **C#** backend services for a SaaS platform serving **400K+ users and 1,000+ companies**, increasing feature delivery efficiency by **20%**.
- Streamlined **AWS** deployment pipelines across **ECS, S3, and RDS**, cutting deployment time by **25%** and simplifying environment configuration.

Software Engineering Intern, Neoenergia – Recife, PE, Brazil — Sep 2024 – Dec 2024
- Built **React** interfaces and **C#** services for an internal platform used by **500+ developers**, reducing task completion time by **23%**.

Research, Teaching & Leadership

Data Scientist & Researcher, CoDes – Recife, PE, Brazil — May 2024 – Aug 2026
- Built and trained **10+ neural network models** with **PyTorch**, **scikit-learn**, and **TensorFlow**, attaining **90%+ accuracy** on Portuguese fake news classification and improving model performance by **5%+**.

Co-founder & Coordinator, Software Engineering League, UFPE – Recife, PE, Brazil — Sep 2025 – Aug 2026
- Co-founded and coordinated software engineering training for **30+ students**, covering development practices, agile methodologies, and project organization.

Teaching Assistant, Database Systems – UFPE – Recife, PE, Brazil — Mar 2024 – Mar 2025
- Guided **200+ students** through the design and validation of **50+ relational schemas**, covering **ER modeling**, normalization, **SQL DDL**, constraints, and query design.
